

At the Institute for Artificial Intelligence Research and Development of Serbia we are looking to help create the future of AI. As a **junior** member of our team, your job will be to help us build it.

You'll be a valued member of your research team dealing with specific technical issues in the domain of artificial intelligence, publishing at the top AI conferences, in the top journals and working with our global network of mentors and collaborators. Ideal team members have a Master's degree or equivalent, domain expertise in specific areas of AI (e.g. Computer Vision, NLU, etc.), are adaptable and resilient, eager to tackle unfamiliar situations with curiosity and tenacity, and thrive in a multinational and diverse working environment.

We offer competitive salaries, flexible hours and an opportunity to be based anywhere in Serbia.

If you are interested, provide us with your CV, preferably followed with link to GitHub/Google scholar/LinkedIn or other relevant professional platform.
